(a) prior and posterior
mixture prior
single Beta prior
mixture posterior, 15 of 20
single Beta posterior
free throw rate p
(b) shrinkage
raw k/n
single conjugate
mixture
posterior mean
k/n ($n = 20$)
(c) type identified
$n = 5$
$n = 20$
$n = 100$
P(guard type | data)
k/n
